November 2, 1956

Dear Allen,

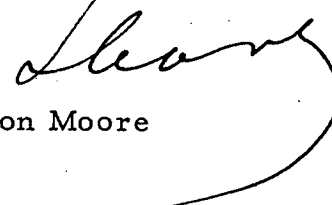

I have begun my treatments in the Presbyterian Hospital with the 24-million volt Betatron machine which make me a little shaky. As I have to take about twenty of these treatments, I am hoping that by next week I shall get more accustomed to them and be able to start work on a paper about Soviet Affairs, which I am most anxious to write.

Unfortunately, I do not receive any more "Pravda" and "Kommunist" which your office used to send me. This reading would be most helpful, especially now when I do very little work in the office and spend a lot of time in a horizontal position.

(b)(1)
(b)(3)

With my warmest regards.

Cordially yours,

Leon Moore

LM DS
