19 December 1966

(b)(3)

Gentlemen:

The enclosed sheets are the recordings that represent most of the data you and Fred discussed. The surface pass occurred at a time when the equipment was malfunctioning; therefore, no record worth sending. We are especially interested in the aspects of data analysis suggested by the filtered fundamental—and—harmonic records shown on one of the sheets.

We are looking forward to seeing you sometime next month. Meantime, we are prepared to make our installation as now scheduled.

Yours very truly,

Mayore Word
Robert L. Waters
