3. The Syrian front appears to have been the quietest today since the war began. There was little activity either on the ground or in the air. A high-level Israeli military officer reports that Damascus is using the lull to re-equip two of its armored divisions with new tanks delivered by the Soviets to the Syrian ports of Latakia and Tartus.

## THE EGYPTIAN FRONT

- 4. Cairo and Tel Aviv continue to report extremely heavy fighting in the Sinai, but neither is providing many details. Israel claims to have destroyed 110 tanks and 20 aircraft today.
- 5. An Israeli military spokesman has reported that the Israeli task force on the west bank was substantially reinforced during the night. He claimed that as of midafternoon today Israel had about 150 tanks as well as artillery on the west bank and that the task force had overrun Egyptian artillery units and cantured some bridging equipment.

According to the Israeli, the Egyptians are assembling a force of four brigades from the west bank and the Cairo area to attack the Israeli force. Cairo also is reportedly planning to launch a large air attack on the force and the ponton bridge placed by the Israelis across the canal. The Israeli spokesman said the Egyptians have severed some of their own bridges to prevent their use by Israeli forces.
