Re: Mueller, Heinrich and RSHA Personalities

1. Information at this location regarding Mueller is sparse. No major USAIRR dossier for HIM can be located. Check of CR microfilm indexes from Germany indicate no major film dossier either.

Attached are CR index cards regarding Duchstein, Mueller, and Bormann. Also is included possible directions for more research on aliases, false id's, etc.

The Duchstein microfilm dossier is alleged to have been combined into dossier 36486 but this dossier pertains to Alfred NAUJOCKS, who was only indirectly connected to the Gestapo and not at all apparently with Duchstein.

Topical microfilm and USAIRR dossiers appear to be the most promising direction because the personality dossiers have been lost, sabotaged, or are not what you seem to be after.
