

Mark, Scott:

Sorry for the delay. Two on the record quotes from us at CIA. Thanks.

On the record from Dean Boyd, CIA Spokesman

"CIA Director Brennan and Deputy Director Morell provided the SSCI Chairman and Vice Chairman with an extensive written response from the CIA that detailed significant errors in the study. At the same time, they noted that the CIA agrees with a number of the study's findings and has taken steps to address shortcomings identified by the study. The CIA has offered to brief all Committee members and their staff on its response and awaits the opportunity to do so. Once the Committee has had the opportunity to make any necessary revisions to its study, we would be prepared to work with it to determine the best way forward on declassification."

On the record quote from John Brennan, CIA Director

"I remain firm in my belief that enhanced interrogation techniques are not an appropriate method to obtain intelligence and that their use impairs our ability to play a leadership role in the world."
