1952 41

OPERATION: Project SYMPHONY

CASE OFFICER: FIELD: DD 110 **HQ. DESK:** Miss Williams,
Austrian Desk

AGENT: CONDUCTOR **LOCATION:** Vienna

SUB-AGENTS: LILAC **LOCATION:** Vienna
Jewish Agency
personnel reporting to CONDUCTOR Austria

ORIGIN: Sometime in April 1946, SSU began laying plans for a project which was to use the present extensive Jewish emigration as a source of CI information. Preliminary investigations demonstrated that no one in the American Forces in Austria had a clear picture of either the agencies or procedure involved. Consequently it was decided to approach the Jewish Agency directly, appealing to them as former Allies and war time collaborators in an effort to gain the basic knowledge of the Jewish Emigration Service, channels, and personalities. At the same time it was anticipated that through a sincere, direct approach, much fresh CI information could be obtained.

FIRST REPORT: Original project report on SYMPHONY from Vienna dated April 1946. Received at Headquarters around 15 May. Contained outline of project, aims, and background material on Jewish emigration.

OBJECTIVES: Immediate - secret - To obtain CI information from refugees escaping from Russian-occupied countries; composition, trends, and activities of the Communist Parties in these countries; location and identification of concentration camps in Russia and Russian-dominated countries; identification of NVD or MGB deserters; identification of NVD agents or Communist agents planted among refugees; identification and elimination of Nazi elements infiltrating among refugees to escape punishment in their own respective countries.

Immediate - secret - To identify and locate agents of the Jewish Agency in Austria who run both the emigration of Jews from Russian-dominated countries and a highly efficient intelligence service into these countries; to identify individuals who smuggle Jews out of Russian-dominated countries for large sums of money and who, through contacts with NVD officials, also smuggle war criminals and Russian agents into the Allied-occupied Zones for work in these Zones or in Palestine.

DECLASSIFIED AND RELEASED BY
CENTRAL INTELLIGENCE AGENCY
SOURCE METHOD EXEMPTION 3B26
NAZI WAR CRIMES DISCLOSURE ACT
DATE 2006

SECRET **CONTROL**

To locate these persons within official organizations, i.e. Red Cross, Repatriation Committee, UNRRA, who provide false papers and identification cards to smugglers and to emigres for the furtherance of this illegal traffic; to take all measures to eliminate or neutralize such traffic when it becomes a danger to the security of Allied-occupied Zones or their establishments or units.

~~Long-range aim~~ - To penetrate those organizations of a Jewish, political, or intelligence nature of any country which are engaged in sending Russian-controlled agents through this flow of Jewish refugees for the purpose of spreading propaganda or gathering intelligence in Allied-occupied Zones or Allied countries.

*SECRET
PIER*

AGENT BACKGROUND: According to field reports, CONDUCTOR is the head agent of the Jewish Agency in Austria and, in this capacity, disposes of a large network and considerable funds. He is a Jew who claims to have been born in Vienna on 15 February 1921 and to hold Austrian nationality. He claims to be the correspondent for the ~~English~~ newspaper in Tel-Aviv, of which he holds a Palestinian press card given him in Tel-Aviv which expired on 18 August 1946. He also claims to be the correspondent for ~~Polish~~ (Palestine Telegraphic Agency) for Austria, Germany, and the Middle European countries. He is officially accredited with the Local American Joint Distribution Committee as a staff member and travels sometimes on orders provided him by USFA through the AJDC. He is accredited to the British Public Relations Officer, PRA, because "he transmits newspaper items and reports to London and Palestine."

Officially CONDUCTOR is in Vienna to collect items of Jewish interest, principally atrocity items, for his newspaper employer. This he professes to do through interrogation of Jewish refugees. Actually it is claimed that he runs a highly efficient intelligence network through couriers into Roumania, Czechoslovakia, Hungary, and Poland. He also supposedly controls another network which tracks down Germans, either free or in captivity, who are suspected of or proven to have committed atrocities against Jews during the war. He turns over this information to official authorities for War Crimes investigation. CONDUCTOR and his agents track down any clues or documents which might be of value to the Jewish Agency.

In addition to his intelligence activities, CONDUCTOR and his men are coordinating and running the emigration of Jews from Roumania, Czechoslovakia, Hungary, and Poland.

~~SECRET~~

SUB-AGENT BACKGROUND:

*Erich
WENDER*

LILAC was born in Cernowitz, Bohemia, 16 October 1907. Is a machine construction engineer. Studied in Bordeaux, France, and Milwaukee, Samsay. Worked in Vienna, Roumania and South America. Returned to Vienna in 1930. In 1939, LILAC was arrested by the Gestapo in a Jewish round-up. The Gestapo was interested in his travels and linguistic abilities - he speaks Hungarian, French, Spanish, Roumanian, German, and Yiddish. He was offered the job of working for the German "Army" in order to escape the fate of the other Jews, and accepted. He was given W/T training and posted to I vi, Ast Vienna. During the war, he travelled to Budapest, Istanbul, and Syria on missions for the GIS. He also professes to have been a double agent for the British in Istanbul.

LILAC claims to be a fervent Zionist. He contacted members of the Jewish Agency and acted as a courier and agent for them in addition to his travels for the GIS and work as a British DA. He appears to have made a considerable personal profit in handling Jewish Agency money for refugees and worked in conjunction with GROSS, WIENINGER, BRANDT, and perhaps LAUFFER. These individuals were opportunists of the worst kind, preying on Jewish refugees for their own personal gain and were also responsible for a serious penetration of OSS through Operation DODWOOD.

LILAC was arrested by the Americans for black marketing in Vienna. On 23 May 1946, he was remanded to the custody of DD 110 who wished to employ him in connection with Project SYMPHONY. Washington vetting revealed LILAC's unenviable background and it was urged that caution be used in his employment. DD 110 considered that LILAC's contacts as a black marketer and professional agent gave him access into certain circles which would provide invaluable intelligence for the SYMPHONY Project, and planned to control him accordingly.

CONFIDENTIAL

CONFIDENTIAL

SUMMARY:

DD 110 originally approached CONDUCTOR in the guise of a newspaper correspondent who was searching for the complete Jewish emigration picture.* The contact was successful and CONDUCTOR was left alone for weeks before the question of CI information was broached. At that point DD 110 advised CONDUCTOR that he was with an American Intelligence organization and desired information of a purely local character. CONDUCTOR was willing to cooperate especially in regard to information on other emigration "recruits" which might endanger his own Jewish Agency activities in the eyes of American authorities.

April

May

CONDUCTOR requested that DD 110 meet Mr. HOFFER, routing representative in Europe for the Political Section of the Jewish Agency. (Note: The Political Section is charged with intelligence activities and files). It was evident that CONDUCTOR had reported his American intelligence contact to his chiefs and wanted to make this contact official. The interview took place and DD 110 told HOFFER that at this particular time there could be no question of an overall policy of official cooperation between DD and the Political Department, although he was convinced that local cooperation would be sanctioned. This did not please HOFFER who stated that he had hoped that since the British had broken off all official contact with the Political Department at the end of the war, the American Intelligence Services would somehow cooperate.

HOFFER also stated that any intelligence which his organization would supply would be that which did not go against Jewish interests. In connection with this, he mentioned that some 650,000 Jews still live in Russian-dominated countries and he didn't wish to endanger these Jews by spying on the Russians or antagonizing them in any way. He also expressed the hope that successful cooperation between the Jewish Agency and American Intelligence in the field would result in a high level overall collaboration in Europe and the Middle East.

* This statement was made in a progress report from the field. In an interview at Washington Headquarters upon his return, DD 110 informed the Washington case officer that he had known CONDUCTOR well just prior to and in the early years of the war in the Middle East where they had undergone special training for an Army operation (OSS ?) together.

CONFIDENTIAL

CONFIDENTIAL

May (Cont)

On 15 May, CONDUCTOR learned from a source in British counter-intelligence that the British were launching a wholesale campaign to locate CONDUCTOR and his network and any other organizations involved in Jewish clandestine emigration in Austria. At about this same time the British Chief of Frontier Control approached GIB, G-2, USFA to arrange for cooperation and exchange of intelligence on illegal Jewish emigration. On the advice of DD 110, who attended the conference, no commitments were made by the U.S.

Through his British source, CONDUCTOR was allowed to see complete censorship intercept files on himself and the Jewish Agency. The British also had transcripts of all telephone conversations made from his apartment and from Jewish Agency lines in Vienna.

Sometime in April, LILAC was arrested by CID, USFA, for implication in black marketing activities for which he was liable to a sentence of from one to five years. Presumably on CONDUCTOR's advice, DD 110 had LILAC "sprung" from jail on 23 May 1946 for use in Project SYMPHONY, despite his unenviable background.

In a memo to Washington dated 27 May, DD 110 stated that with the entrance of LILAC into Project SYMPHONY the covert phase of the project was to begin. His duties would be comprised of any investigations, contacts, and interrogations of a covert nature; contacting former Jewish members of the GIB now working for the Russians; contacting black marketers; smugglers, etc., who use their GIB contacts for the furtherance of their business; the investigation of case officers of the British Intelligence in Vienna who are concerned in Jewish affairs; collection of covert information on the Jewish Agency, or any Jewish organization of a subversive character. LILAC agreed to work for 750 shillings per month and some rations.

In the original project report it was stated that the Jewish Agency was arranging the desertion of a Jewish NVD "Mayer" in Vienna around the middle of May. This individual would then be placed at the disposal of SSU. This was rather a misrepresentation of the truth. In actual fact, Michael PERES, the Mayer in question whose movements have been somewhat dubious and never fully clarified, was arrested on 25 April by CID, USFA in Vienna along with CONDUCTOR and other Jewish Agency personnel when all Jewish DP camps in Vienna were raided.

SECRET

CONFIDENTIAL

May (Cont)

PIRES was held for possession of fire arms although the others were released after 24 hours. At the invitation of GORDON, DILLID arranged to have PIRES sprung for investigation purposes. The information obtained from PIRES, in the opinion of Washington headquarters, did not warrant his release. It appeared to be valid, but either well-known or already out of date. PIRES was not returned for presentation. Through SSI facilities he was transported to Munich and GORDON has henceforth promised to be responsible for him there.

On 20 May, through Project STERKENT, DD 110 came in contact in Vienna with a certain DENSET, a Russian Jew who was anxious to reestablish his Soviet citizenship and establish himself and his wife in Palestine. DENSET was a civilian employee in the Soviet Army and head of a secret technical organization at Soviet HQ in Austria which was engaged in recruiting at any price leading physicists for atomic research in Russia. DENSET did not wish to make use of regular emigration channels as they were too slow and he considered that the Russians thought him so important that they would investigate a nationwide search for him if he remained in Austria for even four or five hours after leaving his job. He desired rapid transportation into Italy where he considered he would be comparatively safe and from there would use ordinary Jewish emigration channels. In return for this aid, DENSET stated that he would be able to supply details on life in Russia, political information, and economic intelligence which might be of use to a democratic state. He specifically said that he would have scruples about revealing any Soviet state secrets in regard to his ~~own~~ connections as he did not want to be branded as a traitor or spy for the Western Allies which might antagonize the people he would associate with in Palestine. DD 110 considered this point could be taken up again under more propitious circumstances.

Secret/Info

Washington HQ was first apprised of this situation on the receipt of an information copy of a cable from SSI Vienna to SSI Rome stating that arrangements were being made in Vienna for transportation of DENSET by American plane and requesting that SSI Rome supply an apartment for DENSET and wife with a permanent guard.

CONFIDENTIAL

May (Cont)

Further details from the field supplied at Washington HQ's cabled request revealed that G-2, USFA, was arranging for transportation details. (It later transpired that the Joint Chiefs of Staff disapproved USFA's participation in the operation).

June

After consideration of the case at high policy level, Washington HQ advised Vienna to take no further action concerning DONSKY; not to intercept or interrogate him if he arrived in U.S. territory through regular channels as he planned to do if not assisted by the U.S.; not to involve the United States. This decision was taken for the following reasons: 1) There appeared to be strong grounds for belief that DONSKY's defection was a planned Soviet provocation; that it was, in all probability a trap, similar to the SAHER affair, to apprehend the United States engaging in unfriendly acts toward the Soviet Union.

A cable was sent from SSS Cairo to SSS Vienna, evidently in answer to a request from Vienna for information, which stated that CONDUCTOR was unknown in the Middle East; that he had not worked for SENE, and that his press card was false. Cairo suggested caution.

On 20 June, an intelligence report was received from Project SYMPHONY to the effect that one Betty Thompson O'DONNELL, an employee of OSI (b), British Troops Austria in Vienna, was the source of CONDUCTOR's British intelligence and the individual who had allowed him to see the censorship intercept files as well as some top secret cables. Miss O'DONNELL had asked for a discharge from her British employment and was planning to leave for London on 11 June where CONDUCTOR had recommended her for an important position with the Jewish Agency office in London.

July

This information was disseminated to SSS London who immediately requested that the control classification be lifted from the dissemination so that the information could be passed to the British. SSS London felt that American information on O'DONNELL which was withheld from the British would endanger the mutual confidence which was indispensable to successful liaison.

SECRET

CONTROL

CONFIDENTIAL

- 8 -

Aug.

SSU Vienna replied that the delicate nature of Project SYMPHONY necessitated the absolute control classification. The report on O'DONNELL had been given in confidence to the case officer, DD 110 who was himself a former Jewish agency official. This was the first knowledge Washington HQ had of this fact. Vienna suggested that they make a partial disclosure to the British in the field.

In view of the facts that there was a strong possibility that O'DONNELL was completely British-controlled and disclosing information on their instructions; or that the British had knowledge of her subversive activities; or that an individual leaving British counter-intelligence employ to take a position with the Jewish Agency would doubtless be under British investigation or surveillance, Washington HQ directed that the disclosure be made verbally in London, protecting source as much as possible.

A USFET, MIS officer, not connected with SSU, during informal discussions at Washington HQ, revealed that he and many others had knowledge of DD 110's activities concerning illegal Jewish emigration and border control. This fact would tend to indicate that the security of Project SYMPHONY, despite its delicate nature, was not all it should be.

Sept.

DD 110 left Austria for the United States at the end of June for discharge from the Army. He discontinued his connections with SSU and it is understood that he returned to his civilian employment as diamond merchant. Project SYMPHONY has been suspended since his departure pending the appointment of a new case officer and a decision as to the best use which can be made of this operation.

EVALUATION: Jewish DP Situation in Austria

Pursuant to the policy of the United States Government, refuge must be furnished persecuted persons who arrive in the USFA area. Thus, all Jews who arrive are fed and sheltered by the U.S. whether their arrival was legal or illegal. The Jewish underground railway, which is believed by USFA officials to be organized and run by agents of the Jewish Agency, is, however, building up the explosive force of the Jewish refugee problem in U.S. occupied zones in Europe. Certain bellicose elements in Jewish DP camps have been organizing demonstrations against the British; units of the terrorist organization Irgun Zvai Lemod are a constant source of trouble because of their readiness to accept the slightest provocation to incite civil disorders; Jewish DP's receive supplies from UNRRA in excess of their actual needs and a good proportion of this excess is directed toward the encouragement of black market activities.

USFA cables and correspondence contained in the Project SYMPHONY file demonstrate that, because of the problems inherent in the situation, USFA is making a strong effort to control the illegal influx of Jews who arrive for the most part through the Jewish Agency underground (which CONDUCTOR apparently heads in Austria). Representations have been made by USFA, at the direction of USFET, to the Soviet AOC in Hungary and the Hungarian Prime Minister that they should redouble their efforts to prevent the illegal immigration of Jews from that territory.

Thus, in Project SYMPHONY, SSS finds itself indirectly sponsoring, and supplying certain facilities to a movement which U.S. military authorities are trying strenuously to control.

CONDUCTOR and his Jewish Agency network

The Jewish Agency, although a recognized and accepted executive body for the Jewish people, has been more and more associated with, if not actually sponsoring, certain terroristic groups in a desperate effort to attain its aims. CONDUCTOR appears to be a bona fide Jewish Agency official in Austria. In actual fact, his organization is extremely terroristic in its methods and recognizes no obstacles to the accomplishment of its purposes. CONDUCTOR is apparently a man of great personal power who has a strong influence on his men. He also appears to be highly intelligent and well-educated. His organization has a cloak and dagger aura and operates along "conspiratorial" lines.

SECRET

CONFIDENTIAL

EVALUATION:
(Cont)

CONDUCTOR's methods are strong-arm and unethical. He does not hesitate to "arrest" individuals who interfere with his operations. These individuals are interrogated, thoroughly beaten up, subject to the third degree and finally, if it is decided that they are quite undesirable, shipped off to Munich where they are "taken care of" or "liquidated".

That DO 110 has little influence over CONDUCTOR in this line is evidenced by one incident when he stated that there was no possibility of interrogating a certain individual because he was being held by CONDUCTOR and would "be taken care of". In another instance, CONDUCTOR's men interrogated and beat up a man when they then turned over to an American MP where DO 110 was then able to interrogate him.

A letter found in CONDUCTOR's files contained the statement that his men planned to organize large Jewish protest demonstrations as a means of intimidation to obtain the release of some of their agents from jail.

CONDUCTOR has apparently achieved a certain degree of penetration of his own of American installations. Following an American raid on Jewish BP camps, he removed in time all his papers of intelligence interest. He is in possession of a number of forged BP border crossing permits stamped with false rubber stamps supposedly originating from the BP Section, Vienna Area Command.

Many of CONDUCTOR's men are in jail in Budapest where they have been interrogated by the Hungarian Political Police and the MVD. It may be assumed that the two latter groups have extensive knowledge of CONDUCTOR's operations if they have not, in fact, achieved actual penetration of his network.

Other illegal activities include dealings in narcotics and the wearing of American and British uniforms.

Shooting incidents at the frontier have been prevalent. A car race along the frontier while the occupants take pot shots at Russian border troops and at Austrian Police. They have now-killed several members of both organizations. This activity may logically be attributed to CONDUCTOR's men who have made the statement that they are accustomed to "work over" new border troops.

CONTROL

- 11 -

EVALUATION:
(cont)

CONDUCTOR, in his capacity as newspaper correspondent, is the source of much Jewish atrocity and pro-Zionist propaganda which he sends as press releases to **FALGER** in London with the request that publication in the American or world press be arranged.

There is no need to elaborate on the dangers inherent to **SSU** through its connections with this terrorist group. The fact that **DD IIG** was himself a former Jewish Agency official may account in part for the collaboration having become as close as it did.

Intelligence received from Project **SIMPHONY**

SSU is now in possession of a detailed picture of the workings of illegal Jewish emigration in Austria as sponsored by the Jewish Agency and by various independent emigration "rackets". The intelligence aspects of this illegal emigration have appeared rarely if at all in **CONDUCTOR**'s reports. The question arises as to the counter-intelligence value of such voluminous information on a highly localized movement which is well-known and constantly being reported on in the press.

CONDUCTOR has presented from time to time very brief items of low grade intelligence on the identification of **NVD** or Hungarian State Police personnel around Vienna and Budapest. There has been no evidence that **SSU** is getting any information from **CONDUCTOR**'s "highly efficient intelligence network" which he professes to operate through couriers into Rumania, Czechoslovakia, Hungary, and Poland.

Mr. **RUPFER**'s statement that he would do no spying on the Russians or antagonize them in any way would appear to eliminate the possibility of any high grade Soviet intelligence being obtained through this project, which was an outstanding item in the stated **OBJECTIVES**.

The Washington case officer for Project **SIMPHONY** who has processed the information obtained so far, has characterized that information as "garbled and of most uncertain accuracy".

SECRET

CONTROL

EVALUATION:
(Cont)

Services Rendered or Planned by SOI for Project SYMPHONY

In comparison with the intelligence material received so far from this operation, it seems certain that the connection is proving to be definitely more profitable for the Jewish Agency than for American Intelligence authorities. It was Mr. NEFFER's stated intention that, since the British officially covered their intelligence connections with the Jewish Agency, he wished to secure the sponsorship and collaboration of U.S. Intelligence for his organization at a high level. Local collaboration as in Project SYMPHONY has no doubt justified his opinion as to the value of such a relationship.

DD 110's former Jewish Agency connections and sympathy, as a Jew, for the work of the Agency have no doubt colored his approach to the Project more than would have been the case with a less susceptible officer. He also appears to have been highly impressed and influenced by CONDUCTOR's personality. CONDUCTOR has requested and received the following services through DD 110's official intelligence connections since the start of the Project:

- 1) Michael PINES, a Jewish Agency member, was sprung from a U.S. jail and allowed to leave for Munich under parole to CONDUCTOR.
- 2) LIAC, a Jewish Agency member, was sprung from a U.S. jail and taken on as a paid agent for Project SYMPHONY.
- 3) Two Hungarians, members of an illegal emigration organization, were arrested by the Provost Marshal, VAC, upon DD 110's request. The reason for this request appeared to be that the men were considered undesirable by the Jewish Agency.
- 4) DD 110 made arrangements for DOMSKY, whom he met through his Jewish Agency contacts, to be flown to Italy by American plane and for an apartment to be provided for him there. This in spite of the fact that DOMSKY stated he would not reveal any USSR official secrets. During the interview with DOMSKY, a U.S. Jewish Chaplain who was present recommended DD 110 as acting as a "real Jew" who would be able to facilitate DOMSKY's illegal emigration if anyone possibly could.
- 5) CONDUCTOR's office which serves as cover for his intelligence activities is officially known as "an American transit camp for Jewish former concentration camp inmates".

EVALUATION:
(Cont)

- 6) The British commenced a wholesale campaign to control illegal emigration and to gather intelligence on CONDUCTOR's network. This forced CONDUCTOR to adjust many of his arrangements and proceed in a more covert fashion. When the British approached USFA for exchange of intelligence on illegal Jewish border activity, DB 110 officially advised that no commitments be made.
- 7) The Jewish Agency is endeavoring to use its U.S. connections to control or eliminate other emigration organizations which interfere with its own operations.
- 8) DB 110's official reports are often colored to the effect that certain U.S. elements have taken "a completely biased attitude toward Jewish emigration" or that they are acting with little real knowledge of the true situation.
- 9) DB 110 has knowledge of, but has taken no action on, murders, kidnapping and torture as executed by CONDUCTOR's outfit. In this way, he has possibly placed himself and, through his official capacity, American intelligence authorities as well, in the position of sanctioning such activity.

Situation vis-a-vis the British

There is no need to emphasize the dangers inherent in American cooperation with the Jewish Agency without British knowledge in the light of the present explosive Jewish crisis, and more especially since the British themselves have severed all intelligence connections with the Agency. In spite of all security measures and controls employed in Project SYMPHONY, it seems inevitable that the British will learn of U.S.-Jewish Agency contacts if they are not, in fact, already aware of them for the following reasons:

- 1) All of CONDUCTOR's and Jewish Agency mail has been intercepted by the British and all telephone conversations British-monitored.
- 2) In the O'DONNELL case it appears most likely that, since she was an employee of GSI (b), the British had knowledge of her activities; or that she was, in fact, a British double agent. In any event, her transfer from British counter-intelligence work to a position in the London Jewish Agency office will most certainly cause the British to investigate the situation.
- 3) All the intelligence files of the main office of the Political Department of the Jewish Agency in Palestine were seized by the British in Operation AGATHA.

SECRET CONTROL

EVALUATION:
(Cont)Possible Future Use of Project SYMPHONY

Project SYMPHONY has been more or less static since the departure of the case officer, BD 110. It has, so far, failed to accomplish any of its aims, as outlined under OBJECTIVES, apart from supplying localized information on illegal Jewish emigration. On the other hand it has been instrumental in supplying certain facilities, possibly incriminating to the United States, to the Jewish Agency and Jewish illegal emigration partly, it is felt, through the emotional involvement of its case officer.

The use of Jewish illegal emigration to obtain information of counter-intelligence value and to initiate certain penetrations should be a profitable operation and it is not thought that Project SYMPHONY should be abandoned. Certain steps were outlined in the original report whose feasibility has not apparently as yet been investigated. It is suggested that the Project could be further utilized along the following lines:

- 1) A case officer should be provided who has no present or past connections with Jewish official bodies or the Zionist Movement so that he would not conduct the operation with an emotional bias. The field considers that a knowledge of the Hebrew language is essential, but it is felt that there are very few Jews outside of Palestine who speak Hebrew or Yiddish to the exclusion of any other language.
- 2) The original SYMPHONY report stated that, for the execution of project aims, American personnel would be placed as newspaper men in Jewish DP camps for the interrogation of refugees, their aim being to collect intelligence on Russian CB, NFD and NGB activities of recent date, and background material of an economic and political nature. It was considered that this would be the starting point for the careful recruitment of Jewish agents who would collect information on emigration movements and eventually penetrate these engaging in intelligence activities. There is no indication from SYMPHONY reports that this phase has been put into operation.
- 3) Washington memo to Austria, Amson, and Rome, X-4115, dated 12 March 1946 contained the outline of a plan for the penetration of NGB efforts to send Soviet Jewish agents to Palestine through illegal emigration channels. This was a long-range project, but there is no evidence that the possibilities of putting it into operation have been explored.

SECRET**CONTROL**

- 15 -

EVALUATION:
(Cont)

- 4) The exclusive use of CONDUCTOR and his organization in the Project should be abandoned and his attempts to employ American facilities for his own purposes should be better controlled. It might, at this point, be profitable to recruit a Jewish refugee for the specific purpose of penetrating CONDUCTOR's organization in order to ascertain 1) the existence of his professed efficient intelligence network into Eastern European countries and the type of intelligence obtained from the network, none of which appears to have been passed on to SSB at this point; 2) the extent of CONDUCTOR's penetration of American agencies.

Following is a list of intelligence reports received from Project SYMPHONY to date.
