[REDACTED]

Left JIC to be separated from service (inactive duty - Army). Subsequently, he proposed to take it easy for some time, and he has a farm close by in Maryland and a town house. He took a long vacation. When he got back from vacation, he settled down in Washington; considered a job as Washington representative for some firm -- movie firm, publishing firm, or something. Wife is independently wealthy. Did not plan to do much work when he got out of service.

House Military Affairs Committee decided to study whole picture and they engaged [REDACTED] to be one of the main, if not the, investigator to write report for them. Of course in doing that, he went all around town and conferred frequently with Adm Souers and went to other agencies. It is believed that he never applied for a job with CIG. (influence considerably, if not solely, by him.)

In G-2, Balkan Specialist Group. Worked with Black, Michela, etc. He is quite biased; strong feelings about everything -- no gray, only black or white. One of the major things was a personal matter of disagreement over a report with McCormick when he was in G-2. As a result of his old feud with Alfred McCormick, when he was trying to work out the central idea, he was seriously affected by his personal experiences with McCormick. The other thing was his environment in G-2. He is as accurate a mouth-piece of the specialist group as anyone over there. He is a protege of theirs.

Never worked in CIG. Nothing against him that the record would show. A majority opinion was not entirely favorable but it was more due to his opinionated nature than to anything he did. Some people like him well and get along with him fine.
