Swedish Ambassadorship at the United Nations. When I discussed this matter later with \_\_\_\_ \_\_ the latter said that this report was matter later with totally at variance with the official line he received from the Foreign Office where Ambassador Sohlman is regarded as a great Russian expert, very close to the Foreign Minister Unden and frequently called back to brief the Foreign Office. The Foreign Office ostensibly, at least, desires to retain Sohlman in his present post at Moscow as long as possible because of his great value. A vacant Swedish Ambassadorship at the United Nations (the ECE) has moreover very recently been filled. The discrepancy between these two accounts is so startling that it deserves investigation, which will be pursued as discreetly as possible here, but any Headquarters information or views should be welcome. It may be that Ambassador Bohlen has already reported on Sohlman. One possible explanation for this divergence is the rabidly partisan nature of TIEBAR/20's conservative politics. It is quite conceivable that any friend of Unden is anathema to TIEBAR/20 who, moreover, has also from time to time made critical comments to \_ \_ \_ concerning the Foreign Office generally.

3. TIERAR/20's comments concerning the Raoul Wallenberg case on which he worked personally for the Foreign Office were also of considerable interest. He said that the Foreign Office energy in pursuing this case was largely the result of the strong pressure of public opinion both through the press and through the special Raoul Wallenberg association. I that TIEBAR/20 made it clear, as he had previously stated to the Swedish Government expects another rejection for their latest note to the Soviet Union on this subject, and that the Swedish Government would be left with no recourse but to publish a White Paper. (TIEBAR/20 had previously stated to C I that such publication might be somewhat embarrassing to the Foreign Office because of its probable revelation that until approximately 3 years ago the Foreign Office had not pursued the question with sufficient vigor, although since that time the Foreign Office has been extremely vigorous in its notes of protest and inquiry.) TIEBAR/20 further revealed that he had personally spent 3 months in Germany about a year ago interrogating German returnees from the Soviet camp at Vorkuta and was satisfied of the positive identification of Wallenborg and verification of his presence in Vorkuta by at least one German who had been Wallenberg's cell mate. TIEBAR/20 was therefore positive that he could trace Wallenberg's actual existence up to a certain date, though when \_\_ suggested that this might be as recent as 1949-51, TIEBAR/8 replied "No, much earlier, but I am not at liberty to tell you the exact date" when Wallenberg's actual survival was last certified. TIEBAR/20 is certain that Pacul Wallenberg is now dead.
