UJDREADFUL

1. We have a copy of the dealings between CSW and 40 on the MECHANIX (BOLF) case. Apparently 50 and 40 were in favor of expelling BOLF, but "leiter CSW machte starke Bedenken gegen diesen Vorschlag" and countered with a proposal to send BOLF back as a double with the mission to get himself recruited as a permanent StB man to remain in the CSR as a CSW penetration. CSW proposed communications first by mail, to be sent to a cover address merely for the purpose of determining that BOLF is still alive. The interesting part follows:

2. Communication "in der weiteren Entwicklung soll von der Mikrophotographie und Emulsionsablosung Gebrauch gemacht werden, die es ermoglicht, dokumentarisches Material u.dgl. zu uebermitteln. Hierzu sei erwahnt, dass ein bei CSW selbst entwickeltes Verfahren zur Anwendung gebracht wird, ohne dass das hier unbekante Verfahren der Org. beruehrt wird. Um Genehmigung wird gebeten".

3. In a UJDREADFUL context it is perhaps significant that CSW claims not to know the experience of the Org. in the matter, but claims strictly on ~~his~~ own to have developed a system in which a mikro-photograph is made and the emulsion is then stripped - from the carrier film. As a matter of fact 331 is working on this exact matter but until now on a laboratory basis. Apparently the thing can be done, but is a very ticklish job. I have seen samples. It is not something you pull off in your home photo lab. Yet CSW has the time and facilities to do it without having previously informed 40 or 331 presumably.

4. This may be a lead which can be given to the Dr. for passing to 40 or 331. Either could cite the above quotation and express an interest to CSW in seeing how they do this neat trick.
