5 January 1963

CURRENT INTELLIGENCE MEMORANDUM

SUBJECT: Cuban Propaganda Broadcasts

1. International broadcasts by Cuban radio stations maintain a relatively constant propaganda level at all times, with regularly scheduled and special broadcasts to specific countries as well as general transmissions to all of Latin America. The general theme of these broadcasts is that the "Cuban example" is awakening the "people" of Latin America to the opportunity for revolutionary action against the "corrupt" regimes in power and against "Yankee imperialism" which allegedly supports them. Within the last two months there has been an increase in the aggressiveness with which the broadcasts incite revolt.

2. The official Cuban international service called Radio Havana Cuba is the chief radio propaganda outlet. More commonly known as Radio Havana, this station broadcasts weekly a total of 187 hours and 50 minutes of propaganda in languages which include Spanish, English, French, Arabic, Portuguese, and Haitian Creole, to listeners in Europe, the Mediterranean area, and the Western Hemisphere.

3. Radio Havana's international service was inaugurated on May Day in 1961. It has grown rapidly since that time and is now Latin America's first international broadcaster in terms of program hours. Its time on the air is as follow, in hours per week:

Arabic to the Mediterranean area	- 5 hr 15 min
Haitian creole to Haiti	- 7 hr

~~CONFIDENTIAL~~

CONFIDENTIAL

English to Europe	- 9 hr 20 min
English to the Western Hemisphere	- 17 hr 30 min
French to Europe	- 9 hr 20 min
French to Canada	- 3 hr 20 min
French to Mediterrranean	- 3 hr 30 min
Portugese to Brazil	- 7 hr
Spanish to Europe	- 16 hr 55 min
Spanish to the Americas	- 108 hr 30 min

4. In addition to the regularly scheduled international service, Radio Havana has been known to broadcast special programs in order to take advantage of unique political situations. When serious disorders broke out in the Dominican Republic in late 1961, for example, broadcasts emanating from a self-styled "clandestine" station which said it was located inside the Dominican Republic demanded the overthrow of the Dominican government. The station went off after about a week, but not before direction finder bearings and other technical clues indicated that it had been transmitting from Radio Havana's transmitting facilities in Cuba.

5. Radio Havana states that it makes its facilities available to political groups from other Latin American countries so they can beam programs to their homelands. These programs, which have the evident intent of encouraging subversion and inciting revolt, are presently beamed on regular weekly or twice a week schedule to Guatemala, Peru, and the Dominican Republic. Similar programs were beamed to Nicaragua and Honduras until last September when they were replaced by a single program with wider targets now programmed nightly. These special programs are exemplified by the programs transmitted to the Dominican Republic on 28 January.

CONFIDENTIAL

CONFIDENTIAL

One was a "manifesto" by Dominican Communists (who are based in Cuba) on the recent election of the "demagogic imperialist agent" Juan Bosch as President of the Dominican Republic. Another was allegedly by a pro-Communist group of Dominicans in Cuba called the "National Liberation Movement." It appealed to Dominican university students to demonstrate against the Constituent Assembly meeting in Santo Domingo.

6. There are also two special programs beamed to the United States. "Radio Free Dixie" is a one hour a week transmission in English aimed at US Negroes. The other program, "The Friendly Voice of Cuba," is somewhat more subtle and aimed at a wider audience. Both programs can be heard well in Florida and also in many parts of southern United States.

7. The technical facilities of Radio Havana are at a transmitter site at Bauta, some 23 miles southwest of Havana. At present, no more than four shortwave transmitters are being used, but in the past as many as five have been observed on the air at the same time. These transmitters range in power from 10 to 100 kilowatts, enabling Radio Havana to be heard all over the world. Programs are being sent from studios to the transmitter site by means of microwave relays.
